3 Cover Story: Welcome

Introduction to the Company

5 Overseas Presence

Available in over 30 countries.

7 Product Range

Fabrics, Acoustical Boards & Floorings

15 Our Usp's

Printed, Easy Clean, Flame Retardant, Nexgen Fresh Fabrics

WELCOME

Happy to see you engaged in this issue.

India's prominent fabric manufacturer with a global footprint. Our skilled team, boasting over twenty years of expertise in Fabric, Carpets, and Vinyl Flooring production, is responsible for our top-notch quality, intricate textures, colours, and designs. Monthly, we produce half a million meters of Fabric, Carpets, and Vinyl Flooring.

At Nexgen, we specialize in projects for the Contract and Interior industry. Our product range includes Seats, Walls, Acoustic Panelling, Drapes, and much more. Our Printed Carpets and Vinyl Flooring are widely used in Multiplexes, Auditoriums, Offices, Hotels, and Resorts.

Our diverse services and capabilities cater to the Interior Industry, End-user Clients, Furniture Designers, Manufacturers, and Transport Interior Applications.

We uphold strict qualitative and quantitative management practices to consistently deliver a wider range of high-quality services to our clients.

We hope you find this one enjoyable.

NEXGEN FABRICS

Product Range

FABRICS + FLOORINGS

WORLD CLASS UPHOLSTERY FABRIC

MADE BY NEXGEN

PRODUCT FEATURES

- Easy To Clean
- Extreme Durability
- Damage Resistant
- Non-Toxic & Cruelty Free
- Greener Production

DURABILITY PERFORMANCE

- Tabor Abrasion CS-10, 1000g/1500 resolutions
- Wyzenbeek Abrasion ASTM-4157-2013, 300,000+ double rubs
- Flex Resistance (room temp.) ASTM D2097-91 200,000 cycles
- Bally Flex (-10C) ISO-5402-1 100,000 Cycle
- Hydrolysis Resistance ASTM D-3960-02 10+ weeks
- UV Resistance ASTM D4329-05 1000h
- Light Fastness AATCC 16.3-20. Grade 5 with 3500h
- Crocking AATCC 8-16 Class 5 wet/dry

FIRE RESISTANCE PERFORMANCE

- BS5852#1 and 5
- DIN EN 1021 Part A & B
- CA TB117-2013
- UFAC Class 1
- NFPA 260 Class 1

5 years warranty

FABRICS FOR

(CHAIRS, WORK STATIONS, ACOUSTICAL PODS & PANELS)

A rundown of the materials that can be used to ensure a durable, comfortable, ergonomic chair. Our fabrics are usually chosen for their softness and colour varieties. Regardless of the different assortments, you can choose:

- Fabrics: Bring a world of endless stylish possibilities.
- Leatherette: Classy and sophisticated indeed, leather upholstery is luxurious
- Mesh: Maximum aeration with exquisiteness for ergonomic design and breathability simultaneously.

ACOUSTICAL FABRICS

PREPARED FOR

*Ignoring the noise
& focusing on
work.*

NRC UP TO 0.9

Noise Reduction Coefficient (NRC)

While STC and SRC indicate how well noise passes through different materials, NRC (Noise Reduction Coefficient) measures how well materials stop sound from reflecting (how much sound they can absorb). The NRC is the percentage of sound that a surface absorbs (in other words, hits a surface and doesn't reflect back again into the room). So a carpet on rubber underlay could easily have an NRC of about 0.4 (it absorbs 40 percent of the sound hitting it and 60 percent bounces back), while a glass window might score only about 0.05 (it reflects 95 percent of the sound hitting it straight back again).

Product Specifications

Core	96kg/m3 Fibreglass Insulation with tissue facing
Thickness (mm)	20 - 25 - 40 - 50 mm, custom thickness are also available
Sizes (mm)	600 x 600 - 600 x 1200 - 1200 x 1200 - 1200 x 2400, & many more custom sizes
Acoustic Properties	NRC 0.80 - 1.15 (varies with thickness and mounting)
Edges	Concealed and Hardened
Edge Finishes	Square / Radius / Bevel / Half Bevel
Facing	Fabric
Colours	Wide range of standard colours. Also available in custom colours
Flammability	Tested as per ASTM E84 and classified as Class A
Mounting type	Type A, E200 & E400
Installation	Adhesive, Velcro, Impaling clips, Z clips etc

Sound Absorption Coefficients

Thickness	125Hz	250Hz	500Hz	1KHz	2KHz	4KHz	NRC
20mm	0.05	0.22	0.64	0.92	1.04	1.02	0.70
25mm	0.14	0.27	0.80	1.11	1.14	1.14	0.85
40mm	0.21	0.65	0.95	0.99	1.01	1.02	0.90
50mm	0.22	0.81	1.24	1.30	1.21	1.16	1.15

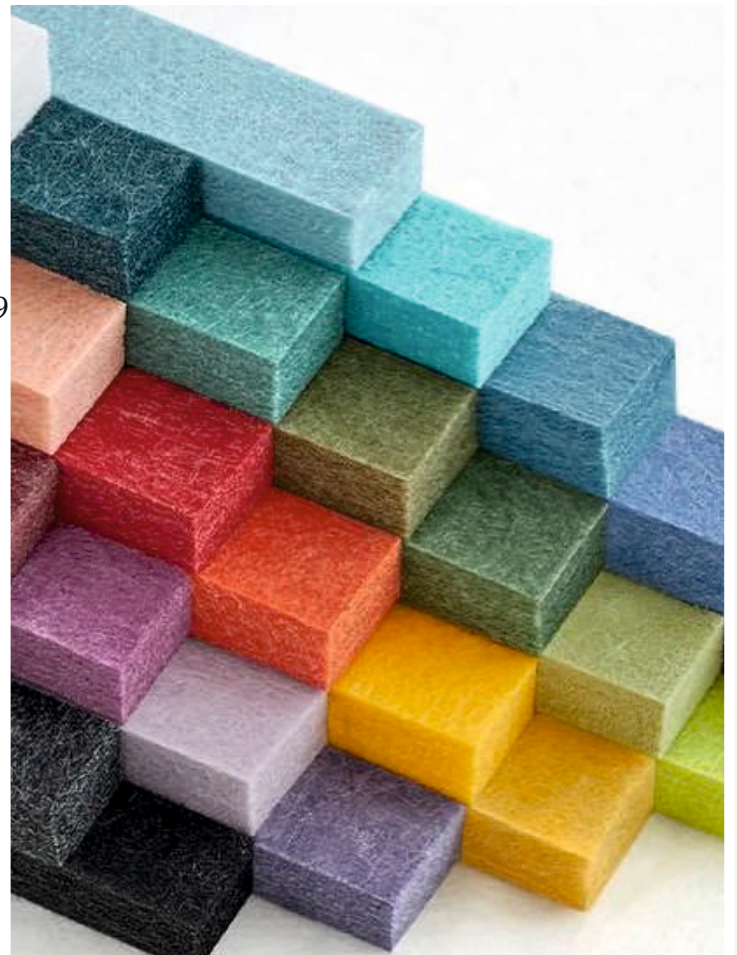

POLYESTER FIBER BOARDS

Product Features

Content	100% Polyester Fibre
Thickness	10mm
Size	2240 mm X 1220 mm
Density	2000 gm/sqm
Acoustic Performance	0.60 to 0.90 NRC
Flame Retardant	EN 13501-1:2007 + A1:2009
Made From	Recycled Pet Waste
Formaldehyde Free	No Binding Agent

Designer Carpets

BROADLOOM

Nexgen Flooring's Broadloom carpets are designed with advanced printing and colourfast technology that promises customizability and longevity when it comes to color and texture.

CARPET TILES

Nexgen Flooring offers a wide range of durable and colorful carpet tile flooring options with various designs, colours, and sizes.

VINYL FLOORINGS

HETEROGENOUS

HOMOGENOUS

SPORTS

Specifications

- **Abrasion resistance**
- **Waterproof & fireproof**
- **No polishing and waxing**
- **Chemical resistance & Antibacterial**

The epitome of modern flooring.

EASY CLEAN FABRICS FLOSS & SOLACE

BY NEXGEN FABRICS

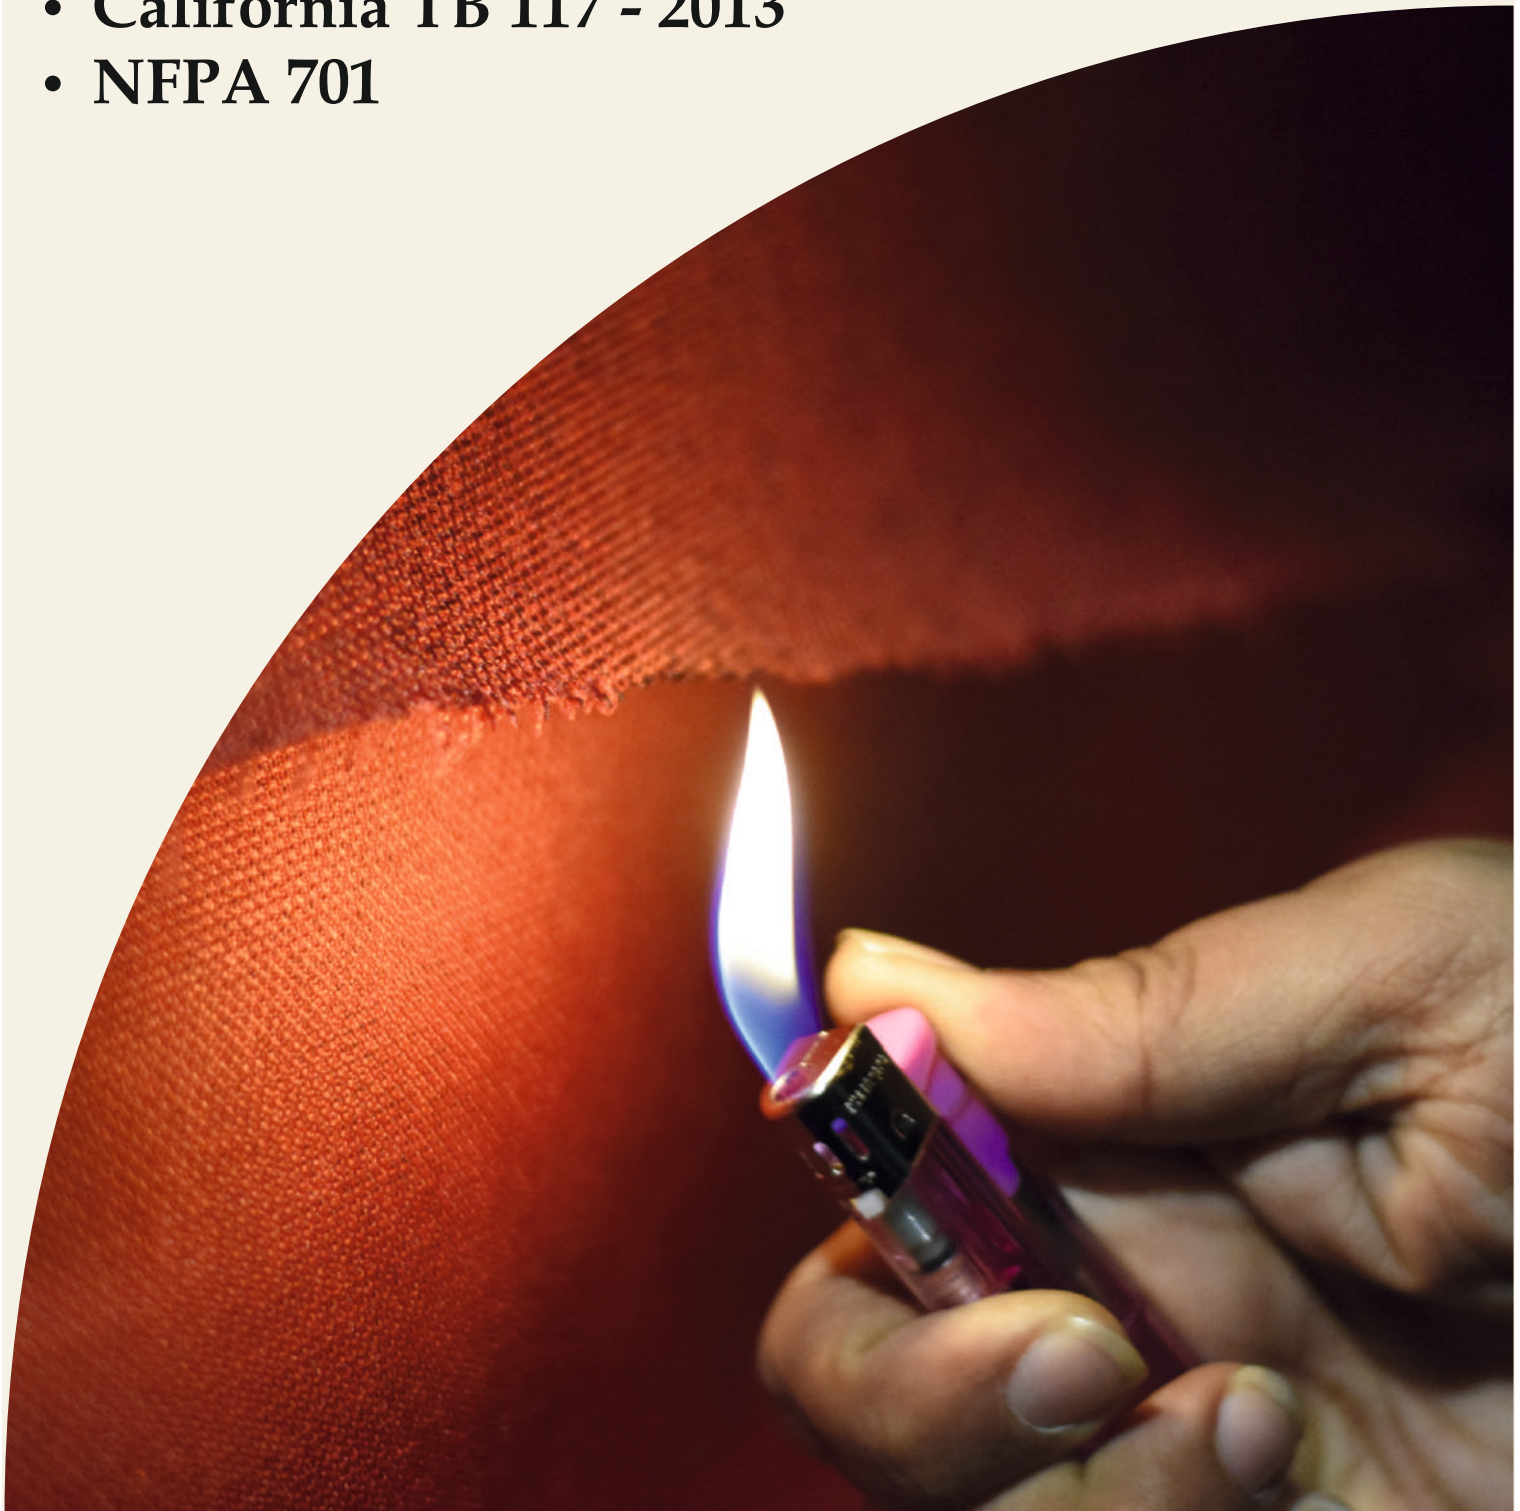

WOULD YOU LIKE TO EXPLORE
THE FASCINATING REALM OF
MAGICAL FABRICS?

A rare blend of intelligence and durability. Exceptional resilience for long-term usage. The fabric is machine washable to maintain its pristine condition. Known to endure for over a decade, regardless of rough handling. High resistance to flammability prevents fire hazards. Easily wipe off stains like ketchup, yoghurt, ballpoint pen, coffee, chocolate, etc., with soap and water.

Flame Retardant Fabrics

- ASTM E 84 Class 1 or A
- BS 5852 Section 4, Source 5 (CRIB 5)
- California TB 117 - 2013
- NFPA 701
